

Lake County Chips

Slash Pile

Guidelines:

- 6" max diameter: small trees can be left whole.
- Have all the cut ends facing the road.
- Piles should be within 5 feet of the road or driveway- not in ditches or under trees.
- No sage brush, ground juniper, roots, root wads, weeds, lumber, or any wood with nails (dirt, rocks and metal will break our machine).
- Making the PERFECT pile: no bigger than 5 feet high x 10 feet deep x 7 feet long.
